

i-Position™ - Imposing solutions

Fast, automated and easy

- Advanced imposition software for CtP users
- Hot folder integration for building digital workflows
- Powerful dynamic solution for varying page formats
- Added features for digital print professionals for full flexibility

i-Position from Glunz & Jensen is a complete digital imposition environment for small print shops, commercial printers and in-plant print companies.

Specifically designed for Portable Document Format (PDF) or Native Postscript (PS) workflows, i-Position includes comprehensive imposing tools for CtP users enabling automated booklet and magazine creation through the process of modifying position, orientation and printing order of individual pages within a document for a specific printing press or binding requirement.

i-Position will also step and repeat smaller jobs allowing maximum use of press sheets and reduced time on press. i-Position delivers an imposition solution that is everything you need for all you can imagine.

i-Position™ - Imposing solutions

Time saving integration

In pre-press, "imposition" means the arrangement of pages on the press sheet so that when folded the pages read consecutively. How you arrange the pages on the sheet depends on the sizes of the press sheet, the pages, and how the job will be folded and bound. It can also mean placing jobs next to each other on press sheets to make the most efficient use of a press sheet to reduce time on press.

Imposition can be a time consuming task when done manually, and some imposition solutions can take just as long to integrate. i-Position from Glunz & Jensen breaks the mould, and delivers imposition that is easy to use, quick and simple to integrate into your existing working environment.

- Pre-defined templates supplied for single-sided and double-sided printing.
- Easy-to-use tools to create and save custom imposition templates.
- Preview imposition on-screen prior to output.
- Automatic page sequencing for booklet and magazines.
- Intelligent 'BEST FIT' feature helps you see which of your existing templates will 'best fit' your document.
- No more trying to work out how much paper will be affected by 'creep' when making saddle stitched booklets, advanced algorithm's automatically and gradually adjust for creep based upon pre-defined paper types.

Simplified workflow

i-Position is the fastest and most integrated imposition software available today. Experience unmatched integration into your existing work environment through i-Position's simplified workflow:-

- Because i-Position accepts either PDF* or PS file formats there is no need to convert file formats before imposition.
- When accepting PDF* documents, i-Position imposes jobs directly in PDF format without intermediate processing steps*, providing a faster and more reliable imposition process.
- i-Position can deliver the imposed files as PDF* or PS, it can even convert PS files into PDF files* during the imposition making it more compatible with third party PDF workflows.
- Simplified imposition template creation is possible thanks to dynamic document handling, which allows i-Position to intelligently and automatically adjust for documents of different sizes allowing documents of various sizes to be sent to the same imposition template.
- All imposition tasks can be automated by a hot-folder based solution allowing users to build their own workflow, or integrate with existing third party workflows.

Unprecedented value

i-Position delivers a significant return on investment by automating the time and labour consuming task of imposing a publication.

- Driven by Ultimate Technographic's Imposstrip engine, i-Position is powered by the Industry leading imposition engine, ensuring maximum compatibility and reliability.
- Use a complete set of the industry's foremost imposing features, built to work together and priced affordably.
- Start to build your own pre-press workflow by using the hot folder functionality, or integrate into an existing workflow.
- Includes 7 tutorials along with sample files to get you started and familiar with your new software.
- Minimise frustrating incompatibilities and enjoy the convenience of full compatibility with Adobe PDF* documents.
- Integrate directly into the iCTP RIP supplied with Glunz & Jensen PlateWriters for a full workflow experience - direct to plate!
- Can also be used to drive digital press's and high speed colour copiers with imposed PDF* or PS output.
- With i-Position Lite, 2-up press format users can unlock only the format size you need, keeping the investment costs to a minimum.

System requirements

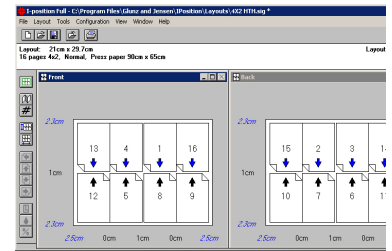

- Intel Pentium 4™ processor
- Microsoft Windows 2000™ or Windows XP Pro™
- Adobe Acrobat Professional™ 6 or 7 installed.
- 384MB RAM
- 3GB of Hard disk space
- 1024 x 768 monitor resolution with 16 bit video card
- (24 bit screen display recommended)
- CD ROM Drive
