

NewsWriter

With No imagesetter, No Film, No Film processor, no exposure units and no developing chemistry or plate processor for that matter, you can eliminate your chemical disposal costs, significantly reduce your energy costs AND improve your working environment by installing a NewsWriter for your plate production.

The only costs you do have, are the plate, the imaging fluid and a maintenance fluid.

To give you a guide as to how much it really will cost to image your plates with an iCtP NewsWriter, and the productivity, please find below 4 samples, for each sample we have calculated the exact imaging cost (including the iCtP Liquid Dot (the actual ink) and the iCtP Maintenance Fluid.)

Imaging cost per job

One Color 22" x 12 1/2"	Four Color 22" x 12 1/2"	Four Color 22" x 25"	Four Color 22" x 34"
			
Sample 1 \$0.89 Avg/plate	Sample 2 \$0.81 Avg/plate	Sample 3 \$0.95 Avg/plate	Sample 4 \$0.99 Avg/plate

The productivity of the iCtP NewsWriter is dependent upon the imaging mode you select, your NewsPaper job size and the image type. The following table gives an indication in both High Speed and in High Quality imaging modes, the productivity based upon the typical jobs shown above.*

			Productivity
17 plates / hr Avg (High Speed)	18 plates / hr Avg (High Speed)	13 plates / hr Avg (High Speed)	11 plates / hr Avg (High Speed)
9 plates / hr Avg (Quality Mode)	9 plates / hr Avg (Quality Mode)	8 plates / hr Avg (Quality Mode)	7 plates / hr Avg (Quality Mode)
